(MARCH- 2022)

ABSTRACT

The purpose of Online Event planner is to automate the existing manual system by the help of computerized equipments and full-fledged computer software, fulfilling their requirements, so that their valuable data/information can be stored for a longer period with easy accessing and manipulation of the same. The required software and hardware are easily available and easy to work with.

Online Event Planner is a process of organizing a professional and focused event, for a particular target audience. It involves visualizing concepts, planning, budgeting, organizing and executing events such as wedding, musical concerts, corporate seminars, exhibitions, birthday celebrations, theme parties, etc. The process of planning and coordinating the event is usually referred to as event planning and which can include budgeting, scheduling, site selection, acquiring necessary permits, coordinating transportation and parking, arranging for speakers or entertainers, arranging decor, event security, catering, coordinating with third party vendors, and emergency plans. Online Event Planner will also generate the reports that how and when the events was managed.

Online Event Planner as describe above can lead to error free, secure, reliable and fast management system. It can assist the user to concentrate on their other activities rather to concentrate on the record keeping. Thus it will help organization in better utilization of resources. The organization can maintain computerized records without redundant entries. That means that one need not be distracted by information that is not relevant, while being able to reach the information.

INTRODUCTION

The "Online Event Planner" has been developed to override the problems prevailing in the practicing manual system. This software is supported to eliminate and in some cases reduce the hardships faced by this existing system. Moreover this system is designed for the particular need of the company to carry out operations in a smooth and effective manner. The application is reduced as much as possible to avoid errors while entering the data. It also provides error message while entering invalid data. No formal knowledge is needed for the user to use this system. Thus by this all it proves it is user-friendly.

Online Event Planner , as described above, can lead to error free, secure, reliable and fast management system. It can assist the user to concentrate on their other activities rather to concentrate on the record keeping. Thus it will help organization in better utilization of resources. Every organization, whether big or small, has challenges to overcome and managing the informations of Booking, Event, Employee, Package, Enquiry.

Every Event Management System has different Event needs, therefore we design exclusive employee management systems that are adapted to your managerial requirements. This is designed to assist in strategic planning, and will help you ensure that your organization is equipped with the right level of information and details for your future goals. Also, for those busy executive who are always on the go, our systems come with remote access features, which will allow you to manage your workforce anytime, at all times. These systems will ultimately allow you to better manage resources.

PROJECT OBJECTIVE

Objective of the project

- This website provides facilities to users to organize the events or parties.
- This project will help the users to have a look around the resorts, farmhouses and caterers around their areas.
- This project will help the users to participate for any happening events from anywhere.
- This project will help any colleges, schools and any companies to contact our company to organize the events.
- This is will help the event manager to track the records of events happened in one year.
- This is will give the user brief description about the services provided into a particular event.
- This will generate the reports about the expenses and money invested in each event.

Purpose

- User friendly, user interactive.
- To give rich information about events.
- Reviews are given so that the quality of each and every event should be maintained.
- Websites must be secured so that user details and other information should not be available publicly.
- Save time consumption, manpower and money.
- Filtering of best events.
- Availability of all events in one website.
- Provides free information about events.

Software and hardware requirements

- **Hardware requirements**

- Processor : Intel Core i5,
- RAM : 4GB of RAM
- HDD : 300 GB or higher
- Keyboard : 108 Keys
- Mouse : 2 button mouse

- **Software requirements**

- OS : WINDOWS 10 or higher
- Front end : Php
- Back end : Mysql

Future Scope

- This software can be easily upgraded in the future according to required features for existing systems.
- It is connected with the network for easily retrieved data and many locations or many districts or cities in different states.
- Demonstrate a new and open minded approach to event organizers.
- System still has some security issues which can be improved later.

PROJECT METHODOLOGY

Modules Description

- **Login:**

Any entity whether it is user or owner enters id & password in the login form. This is for security purpose so that each entity can do his/ her task properly

- **Registration:**

In this module they enter their all details and then they needs to verify their details by means of email or phone number. A unique id is allotted to each user and owner.

- **Events managers:**

There will be one event manager for one event and that manager will assign his team for that event. Event manager is responsible for meeting the clients and discuss their demand and ensure that their team is working properly or not.

- **Home:**

This is for opening the home page.

- **Report generation:**

It will generate the report in yearly basis and will tell about the person attended that event. It will tell about the how many event managers were included in that event. It will tell about the expenditures and revenue about the events. It will generate about the money invested in each props and stuffs which were included in that events.

- **Help:**

It's made for telling about the main entities of the project.

PROJECT OUTCOME

Our project is only a humble venture to satisfy the needs to manage their project work. This online event planner could be implemented at several places requiring to manage different events. This online event planner is quick and handy. This package shall prove to be a powerful package in satisfying all the requirements of the school. The objective of software planning is to provide a frame work that enables the manager to make reasonable estimates made within a limited time frame at the beginning of the software project and should be updated regularly as the project progresses.

Online Event Planner is a multi-million dollar industry, growing rapidly, with events hosted regularly. Surprisingly, there is no formalized research conducted to access the growth of this industry. The industry includes fields such as the MICE (Meetings, Incentives and Events), exhibitions, conferences and seminars as well as live music and sporting events. On the profession side, event management is a glamorous and exciting profession that demands a lot of hard work and dynamism. The logistics side of the industry is paid less than the sales/sponsorship side, though some may say that these are two different industries. Online Event Planner is an e-commerce application that seeks to provide all the services to the customers mainly in occasion, in addition to facilitating the process of product management and booking appointments to clients and provide all the needs of customers.
